- Follow up supporting material and access to online document library

Details

CEEQUAL is an evidence-based sustainability assessment, rating and awards scheme for civil engineering, infrastructure, landscaping and public realm projects worldwide.

Carrying out a CEEQUAL assessment can help clients to:

- Deliver better value and reduce costs
- Enable performance improvement
- Demonstrate commitment to sustainability best practice.

The assessor training course can be attended by anyone interested in improving the performance of civil engineering and/or public realm works. However, there is no need to be an expert in either of these areas to go through the training process and be a successful Assessor.

The Assessor Training Course has been designed so that everyone who completes it successfully will be able to undertake an Assessment, with mentoring by the Verifier on their first Assessment.
